MEMORANDUM FOR: Legislative Counsel

SUBJECT: Follow-up on Conversation regarding Visit of
[redacted] to P&W Develop-
ment Center, West Palm Beach, Florida

25X1

REFERENCE: DD/SA Memorandum to LC/OGC, dated 6 Jan 66,
Subject: Same as Above [redacted]

25X1

1. As a wrap-up to the reference, [redacted] called me
from West Palm Beach the morning of 11 January to state that
[redacted] visit to P&W was concluded on 7 January, after he had
spent two days with them inquiring into the basis for the P&W cost
estimate on the SST engine. [redacted] said that [redacted] had apparently
been briefed on the questions he should not ask having to do with the
J-58 program, because during the entire two-day visit he did not ask
one embarrassing question which would cause either P&W or ourselves
any concern.

25X1

2. [redacted] added that since [redacted] returned to Washington
he has had several reports from the P&W Washington office which tend
to confirm his view that the purpose of [redacted] trip was to get himself
brought up to speed on basic SST engine technology and cost philosophies.
I thanked [redacted] for his conservative handling of [redacted] and on
that note perhaps we can close the books, at least for the present.
